

SCHOOL OF COMPUTER SCIENCE AND ENGINEERING
CONTINUOUS ASSESSMENT TEST - I
FALL SEMESTER 2025-2026

Programme Name & Branch : M.Tech [5 yr]
Course Code and Course Name : CSI 1003 Formal Languages and Automata Theory
Faculty Name(s) : Prof.L.Shalini , Prof.P.Boominathan, Prof.N.Prabakaran
Class Number(s) : VL2025260102472, VL2025260102467, VL2025260102471
Date of Examination : 20-Aug-2025
Exam Duration : 90 minutes
Maximum Marks: 50

Q. No	Answer All Questions	M	CO	BL
1.	a) Let $\Sigma = \{0,1\}$. Define the following languages over Σ: → $L_1 = \{w \in \Sigma^* \mid w \text{ has an even number of 0s}\}$ $L_2 = \{w \in \Sigma^* \mid w \text{ ends with 1}\}$ $L_3 = \{w \in \Sigma^* \mid w \text{ has at least one occurrence of the substring 01}\}$ Perform the operations below and answer the two tasks that follow. i) $L_1 \cup L_2$ ii) Complement of L_2 iii) $L_1 \cdot L_3$ Task1: For each language in (i)–(iii) give a short description and list three concrete example strings that belong to it and two concrete example strings that do not belong to it. Use short justifications. (3 Marks) → Task2: Construct a DFA that recognizes the language in part (i): $L_1 \cup L_2$ (4 Marks) b) Prove by mathematical induction $n^4 - 4n^2$ is divisible by 3 for $n \geq 0$.	7		
2.	a) Convert the following NFA to its equivalent DFA  b) Consider the alphabet $\Sigma = \{a,b\}$. Define two languages: $L_1 = \{w \in \Sigma^* \mid w \text{ starts with a}\}$ $L_2 = \{w \in \Sigma^* \mid w \text{ is odd}\}$ 1. Write a regular expression for L_1 (1Mark) 2. Write a regular expression for L_2 (1Mark) 3. Construct a regular expression for $L_1 \cap L_2$ (2Marks)	6
