

BMEE391J	Technical Answers to Real Problems Project			L	T	P	C
				0	0	0	3
Pre-requisite	NIL			Syllabus version			
				1.0			
Course Objectives:							
<ol style="list-style-type: none"> 1. To gain an understanding of real-life issues faced by society. 2. To study appropriate technologies in order to find a solution to real life issues. 3. Students will design system components intended to solve a real-life issue. 							
Course Outcome:							
<ol style="list-style-type: none"> 1. Identify real life issue(s) faced by society. 2. Apply appropriate technologies to suggest a solution to the identified issue(s). 3. Design the related system components/processes intended to provide a solution to the identified issue(s). 							
Module Content							
<p>Students are expected to perform a survey and interact with society to find out the real life issues.</p> <p>Logical steps with the application of appropriate technologies should be suggested to solve the identified issues.</p> <p>Subsequently the student should design the related system components or processes which is intended to provide the solution to the identified real-life issues.</p>							
General Guidelines:							
<ol style="list-style-type: none"> 1. Identification of real-life problems 2. Field visits can be arranged by the faculty concerned 3. Maximum of 3 students can form a team (within the same/different discipline) 4. Minimum of eight hours on self-managed team activity 5. Appropriate scientific methodologies to be utilized to solve the identified issue 6. Solution should be in the form of fabrication/coding/modelling/product design/process design/relevant scientific methodology(ies) 7. Consolidated report to be submitted for assessment 8. Participation, involvement and contribution in group discussions during the contact hours will be used as the modalities for the continuous assessment of the theory component 9. Project outcome to be evaluated in terms of technical, economical, social, environmental, political and demographic feasibility 10. Contribution of each group member to be assessed 							
Mode of Evaluation: Evaluation involves periodic reviews by the faculty with whom the student has registered. Assessment on the project – Mark weightage of 20:30:50 – Report to be submitted, presentation and project reviews
